

Leaders in Secure Entrance Control

Turnstile Installation, Integration
and Maintenance

As leaders in the pedestrian control space, **Electro** can offer simple user friendly solutions to control the flow of pedestrian traffic from one area to the next, right through to fully integrated turnstile systems for use in high security buildings, prisons or large corporate offices.

DESIGN | INSTALL | MONITOR | MAINTAIN

Turnstiles offer a reliable, simple method to control visitors and ensure only authorised users are allowed access to particular areas of a building at pre-determined times. Offering designs including tripod, waist high, swing pass gates, slim lanes and full height options, turnstiles can offer an aesthetically pleasing solution to enhance your building. As acknowledged experts in the design and supply of turnstiles including those suitable for disabled access, we have a solution that can work in all spaces.

We carry a comprehensive range from world renowned manufacturers, ensuring that we encompass the needs of a broad spectrum of users. All can be customised to suit almost any scenario, locality or theme.

The team here at Electro not only supply a broad range of turnstiles, our in-house project management team can also assist with the design, seamlessly including the specification detail into the overall project plans.

We have 10 engineers locally based in Lisburn and 40+ Engineers across Ireland that make up our installation and maintenance team to ensure all our customers receive exceptional customer service and on-schedule installation and maintenance.

"Electro's range is superb, and not just turnstiles! They also offer a full system package that allows fully integrated solutions including gates, doors and barriers, backed up by a locally based 24/7 support infrastructure that is second to none and well ahead of most."

TURNSTILES

We are leaders in Turnstiles

We can advise, design and create superb turnstile and access control solutions. Using high or low level turnstiles, indoor and out, we can add a professional look to your premises while increasing your security and substantially reducing your staffing costs. We have Northern Ireland's largest range of turnstiles (most are on display in our Lisburn showroom) which can be tailored to suit most interior and exterior schemes and décor. Single or Multiple lanes can deal effortlessly with staff and visitors. Making an impressive entrance is easy when you contact Electro. We can also complete the package with access control systems and automatic doors.

It costs nothing to talk to us and you will be surprised what we can offer.

EQUIPMENT

Perfect for areas where pedestrian traffic control is necessary and even where budgets are important. **TiSO** meets or exceeds all European safety standards and provides customers with a reliable efficient control option, while meeting all demands of a world class pedestrian control product.

Freeway - Space Saving

The Freeway product group consists of sleek, stylish units that compliment any contemporary commercial space. They provide controlled access options and come in a range of designs from slimlane units with glass sides to give a transparent effect to more robust angled units that absorb the glass once the turnstile is in open mode.

The Sweeper - Modern

The swinging gate turnstile comes in waist-high, full height with toughened glass and in wider arrangements for disability access. These units combine three important features, safety, security and design. They were designed for use in corporate spaces, looking elegant while protecting important areas.

The Curragh Racecourse

Electro Automation offers world class solutions for low and high volume traffic flows

Tripod - High Throughput

The Tripod range is full of models that can be optimised for indoor or outdoor use, the revolving arm allows for a high throughput and is perfect for a place where speed and security are of equal importance.

Full Height - Sesame Range

This full height, durable security turnstile provides complete access control for areas where high security and control is necessary. Authorised access is performed by card reader, remote control or manually, they are also available in a number of different configurations.

Service and Maintenance

With all automated products, general maintenance is always a requirement to get the most out of your purchase. Electro offer 24/7 Service and Maintenance through our 40 nationally based engineers, ensuring your equipment will always be operational. Our proactive approach ensures longevity of your equipment way beyond expected product lifecycle figures.

Access Control

The Electro Automation Group designs, installs and maintains the widest range of access control systems that are unsurpassed within our marketplace. We are happy to integrate your existing access control readers within our turnstiles, or we can offer our clients a range of technologically driven solutions that will meet the requirements of every installation, from high security, consierge and visitor control, through to simple visitor monitoring and counting.

Our automation and access control systems can of course be extended through the site to efficiently control all gates, barriers and doors. Ask for details or a free no-obligation survey by one of our experienced surveyors.
