Electro Automation (NI) Ltd

## The Intelligent Automation Specialists

### GATES AND AUTOMATION

The Electro Automation Group have been pioneers in gate automation since 1984 and have a wealth of knowledge and experience in the industry.

This has led to our current position as Ireland's commonly acknowledged leading automation company.

### ELECTRO AUTOMATION DOORS

We can design, supply, install and maintain door automation to suit any building. Systems include sliding, swing and revolving doors.

Revolving doors save energy costs and will reclaim those drafty lobby areas, adding style and space combined with a low pay-back period.

### ACCESS CONTROL SYSTEMS

Today's business environment demands tight control. Health and safety legislation insists that you restrict people from dangerous areas, proper stock control is only possible when access is limited to authorised personnel, and productivity increases when visitors have restricted movements.

### CAR PARKING AND TRAFFIC CONTROL BARRIERS

With more installed sites than all our competitors combined, The Electro Automation Group excels within car parking. No other company can come close to what we can provide. Revenue generating car parking control demands exceptional support, and our investment allows us to provide this and more.

At last, a single company that can efficiently control your entire automated security. Electro Automation will design, install and maintain automatic gates and traffic control barriers for your perimeter security, moving through to automated entrances for the front of your building, and incorporating access control systems to welcome your guests, protect your people and secure your physical assets.

**Remove the Risk - Choose Electro.**
